

Another excellent year for Carver Technologies

Montréal, March 23, 2011 –Carver Technologies, a producer of human resources and payroll management software, reports 70% growth in 2010.

The arrival of **many new customers** in 2010 provided an opportunity for Carver Technologies to improve its business processes at all levels and the possibility to achieve this growth.

This success is proof of the quality of its product and services and the fit between its human resources, time and payroll management expertise and the **market expectations**.

Carver Technologies has organized to continue its **high growth in 2011** by innovating through offers and services that are **increasingly complete and rich in functions** to optimize everyday business HR & Payroll management processes.

Carver Technologies, which reports a customer loyalty exceeding 90% because of **its UMANA solution**, is a recognized expert, capable of coaching the human resources and payroll departments of midsize companies in every industry in meeting their HR/Payroll challenges.

The strong growth in 2010, is the result of its strategic investments in products and services. This continuous growth in Québec and Canada confirms, year after year, that executives clearly understand the **many benefits** of using UMANA in their midsize companies.

In an increasingly competitive environment, UMANA stands out in the market for the great flexibility of its solution, which adapts to its customers' HR context, and the quality of its ongoing coaching relationship. UMANA offers its customers real manoeuvring room via the rule-based systems.

To improve performance in coaching and putting its solutions in place, Carver Technologies strengthened its implementation team in 2010.
