

First Québec municipality to acquire the UMANA Software Suite

Montréal, Québec (November 28, 2011) – Carver Technologies is pleased to announce our partnership with the City of Dollard-des-Ormeaux for the implementation of the UMANA Suite of products: a fully integrated time and attendance, human resources and payroll Software.

All the modules in the Umana line will be deployed at the City. Carver Technologies with its expertise in the field will link the time capture system already in place to its application while implementing rules at the time sheet level which will validate the management rules of the two collective agreements.

“We were looking for a totally integrated solution that could eliminate the management weaknesses of our existing software, while complying with the municipal budgets. This integration will allow the City to achieve major productivity gains in the Human Resources and Payroll Department over the next few years,” declared Odile St-Cyr, Director of Human Resources at the City of Dollard-des-Ormeaux.

This is important news for Carver Technologies. “We are very proud to have made this agreement as we are one of the few management software providers in years to break into the municipal market. This is refreshing news for the 50 biggest Québec municipalities, for which this application is intended,” affirmed Jacques Voyer, Vice-President Marketing at Carver Technologies.

About Dollard-des-Ormeaux

Dollard-des-Ormeaux has approximately 50,000 residents. Sensitive to its residents' quality of life and the needs they express, the City of Dollard-des-Ormeaux has adopted the mission of offering maximum services at the best possible cost. Its priorities and commitments thus are consistent with this process of continuous improvement of the customer services it has developed and that it seeks to promote within its team of managers and employees.
