

## **FOR IMMEDIATE RELEASE**

### **Carver Technologies expertise recognized once again** *The National Gallery of Canada acquires the UMANA line*

**Montreal, Quebec (September 27, 2010)** – Carver Technologies today announced a major contract for the acquisition and implementation of its UMANA line of human resources management, time management and payroll packages.

The National Gallery of Canada (NGC), located in Ottawa, is one of the world's most respected art institutions. It is renowned for the outstanding quality of its collections, its erudition and its matchless ability to attract visitors of all ages, regardless of their artistic knowledge.

“The new multiservice HRMSF will be uniform and simplified in a computerized environment. The data will be easily accessible and the employees and managers will have access to self-service functions. The system's flexibility and receptiveness will allow it to meet our needs regarding payroll, benefit premium payments and human resources, increasing our efficiency,” said Michelle Miner, Director of Human Resources at the NGC.

### **About Carver Technologies**

Carver Technologies is a firm dedicated exclusively to the development of human resources management, payroll and time management software. Since 2004, Carver Technologies has offered a new version operating on the Oracle platform. Carver Technologies serves its clients directly. The line of packages bears the UMANA name. <http://www.umana.ca>
